

Ian W. McMurry

imcmurry3@gatech.edu | ian.mcmurry01@gmail.com | imcmurry.github.io | linkedin.com/in/ian-mcmurry

TECHNICAL SKILLS

Programming & Data: Python, SQL, relational databases, data pipelines, API integration, Excel, Google Sheets
Data Science: machine learning, NLP, transformer models, representation learning, Bayesian modeling, regression, posterior predictive validation
Tools & Methods: PyMC, NUTS/MCMC, LLM-assisted extraction and summarization, KPI/dashboard development

PROFESSIONAL EXPERIENCE

Analytics Engineer Consultant June 2025 – Present
S10 Consulting Remote

- Designed a multi-stage data ingestion and insight-generation platform used by 5+ recurring clients to convert unstructured government procurement notices into structured, searchable datasets.
- Built LLM-assisted extraction and summarization workflows that generate 11 standardized attributes per solicitation through controlled API calls and reusable prompt templates.
- Architected relational schemas and backend pipeline components to transition recurring analysis from manual workflows into a scalable analytics product.

Operations Data Analyst Intern Nov. 2022 – Nov. 2023
TOCA Football Remote

- Analyzed more than \$1.3M in sales data across 14 locations to quantify revenue lost to discounts and support operating decisions.
- Built KPI dashboards for 240+ trainers and automated recurring reporting with Python and SQL-powered Google Sheets workflows, saving 15+ hours per week.

Supply and Logistics Officer July 2023 – Present
United States Marine Corps Japan

- Redesigned documentation and reconciliation processes, increasing transaction accountability from 60% to 92% and project-part shipment throughput by 71%.
- Served as Assistant Operations Officer for a 1,600+ personnel exercise, coordinating planning and execution across distributed logistics operations and major maritime equipment movements.

SELECTED DATA SCIENCE PROJECTS

Hostel Review Representation Learning July 2024 – Present
NLP / Machine Learning Remote

- Built an end-to-end NLP pipeline to process approximately 160,000 hostel reviews across 75 global cities and model subjective attributes including social atmosphere, cleanliness, and guest experience.
- Developed task-specific transformer representation and classification workflows; achieved held-out F1 = 0.826, outperforming generic sentence embeddings and zero-shot GPT-4o baselines.
- Designed a 15+ table relational database supporting ingestion, embedding inference, property-level aggregation, and downstream analysis.

Armenian Housing Rental Yield Modeling May 2026 – Present
Bayesian Statistics / Applied Modeling Remote

- Developed a multivariate hierarchical Bayesian model in PyMC to estimate composition-adjusted rental yields from unpaired rent and sale listings across heterogeneous housing markets.
- Applied NUTS-based inference to 8,863 listings across 36 districts; achieved 91.3%/90.9% empirical coverage of 90% posterior predictive intervals for rent/sale prices with zero sampling divergences.

EDUCATION

Georgia Institute of Technology Atlanta, GA
Master of Science in Analytics; GPA: 4.00/4.00 Aug. 2024 – Dec. 2026
Selected coursework: Bayesian Statistics, Statistical Modeling and Regression Analysis, Computational Data Analysis, Applied Natural Language Processing.

Emory University Atlanta, GA
Bachelor of Business Administration in Finance and Information Systems; GPA: 3.77/4.00 Aug. 2019 – May 2023

PUBLICATION

McMurry, Ian W. “Quantifying Social Sentiment in Hostels Using A Domain-Specific Transformer Pipeline.” 2026
Peer-reviewed paper in *WASSA 2026*, Association for Computational Linguistics. DOI: 10.18653/v1/2026.wassa-1.3.
